International Congress to Meet in Washington.

WILL DISCUSS TUBERCULOSIS

Renowned Physicians, Hygienists, Sociologists, and Humanitarians from All Quarters of Globe Will Hold Session in American Capital

During the hottest part of the Presidential campaign in 1908, Washington will be the scene of one of the most important scientific congresses ever held in America, when a large number of distinguished men from all parts of the world-physicians, hygienists, sociologists, and hu-

This great gathering will be organized under the name of the International Congress on Tuberculosis, and will hold its sand members and delegates, and the scourge. visitors to Washington on account of the congress, it is predicted, will number

eign countries, and in this country it has of late become well known through the popular exhibition of the national association, and of the New York tuberculo sis committee. During the three weeks tors can learn what is going on the world Types that Call on Public Stenoaround in the fight against tuberculosis The exhibition will be open and free to the public at all times, and its contents will be as interesting to the man in the street, or to the high school pupil, as to

The international congress will provide in the exhibition a great collection of in-teresting things, but the congress itself will be a great collection of interesting persons. Many of the distinguished au-thorities on this subject in Great Britain, Germany, France, Sweden, Russia, Japan, Italy, and South America, who are widely known by name in this country, will visit the United States at the time, not only for the purpose of discussing tuberculosis public addresses in Washington and other

Work of Organizing.

The work of organizing the international congress has been intrusted by the national association to a special committee, consisting at present of Dr. Lawrence Flick, of Philadelphia; Dr. Vincent Y. Bowditch, of Boston; Dr. Alfred Mever of New York; Dr. J. J. Walsh, of Philadelphia; Dr. Lawrence Litchfield, of Pitts burg; and Dr. Charles J. Hatfield, of Philadelphia. The committee has appointed a secretary general, Dr. John S Fulton, of Baltimore, who has opened au ington, and he will devote all of his time to the organization of the congress.

Such men as H. C. Frick, Henry Phipps, Henry L. Higginson, Martin Maloney, William P. Henszey, and George Blumenthat are giving their financial support to the movement, and have contributed to-ward the fund of \$100.009 which is being raised to carry through the congress.

berculosis met in Paris in 1905, at which United States. President Roosevelt sec onded the invitation, through Mr. Mc-Cormick, the Ambassador to France, and the invitation was accepted with a great Roosevelt acted unofficially, the govern-ment is actively interested in the Inter-national Congress on Tuberculosis.

Government Interested,

the national association called the matter to the attention of the Secretary of State. and February 25 a memorial, asking for the necessary authority and means, was ing the indorsement of seven out of the high importance, and most foreign governthe meeting in Washington

This occasion will excite extraordinary interest not only among physicians and the medical schools within easy distance attractive to sociologists, for in this country the tuberculosis problem has taken a strong hold on the leaders in organized charity, many of whom have become leaders also in the artistic to the strong through the rest of the play to be entirely rewritten.

At different intervals thereofter.

in numbers will be the veterinarians. In proportion to their number it is probable that the public health officials and the hospital and sanatorium men will be she had learned at school.

on hand in largest force.

Preliminary Organization. In the work of preliminary organization the committee has adopted a policy which seeks to make the characteristics of our political structure quite clear to the foreign visitors. The committee is not sending its invitations directly to private individuals who are interested in tuberculosis, nor to institutions, nor to organizations, official or unofficial, but invitations are being given to governors of all the States, requesting them in turn to invite their municipalities and other local agencies, either directly or through some department of State government. By this means it is hoped that the States engaged against tuberculosis within their

FIGHT WHITE PLAGUE doubtedly leave a permanent impression on the whole country, and will yield large return for the money invested.

General Interest Created

When the forty-five States grow busy in preparation; when the State boards of health, dairy commissions, tuberculosis commissions, live stock boards, schools of agriculture, medical schools, research laboratories, city health departments, and the numerous unofficial agencies dealing directly with the tuberculosis problem begin to make ready for the Internationa Congress on Tuberculosis, substantial values will accumulate at a great rate.

The initial enthusiasm has not waited for a signal from the committee on or-ganization. Public officials in more than a dozen States and in eight or ten Federal bureaus are already active in anticipation of the Congress, so that the task of or-ganization is found in a growing state be-fore the national association, the chief sponsor for the congress, lays a hand

upon it.

The local committee of citizens, which during the past three years has been carrying on what has seemed a vigorous campaign against this "great white plague," looks forward to this worldmanitarians, will assemble to discuss the problem of tuberculosis.

This great gathering will be organized impetus to the campaign it is conducting against this common plague. It wishes to say, nevertheless, that the motive and enthusiasm to combat this deadly foe should sessions from about September 20 to October 19.
